PROCEDURES

1. ELIGIBILITY AND SUITABILITY DETERMINATION

a. In accordance with Military Department program policy:

(1) An RSM's care management team (CMT) evaluates and determines that a service dog may mitigate the RSM's disability. A Service member with a disability consults with his or her primary care manager (PCM) and specialty care provider if the Service member does not have access to a CMT.

(2) The Service member's CMT, PCM, or chain of command, as established by Service-specific policy, may authorize and approve the Service member's assignment of a service dog pending the outcome of a suitability assessment by an accredited service dog organization. Each assignment decision must be documented, along with any recommended limitations on use of the service dog.

(3) The CMT or PCM then refers the Service member to an accredited service dog organization in order to evaluate his or her suitability for a service dog.

(4) The accredited service dog organization conducts a suitability assessment of the Service member for a service dog. This assessment determines whether the accredited service dog organization will provide a service dog to the Service member.

(5) The accredited service dog organization provides the results of the suitability assessment to the Service member's CMT or PCM.

(6) If a Service member is not approved for a service dog by their chain of command and/or CMT or PCM, they must provide a written rationale and the decision that will be reviewed by the first general or flag officer, or Senior Executive in the Service member's chain of command. The review will be conducted by the next highest level of command if the initial decision is rendered by a general or flag officer, or Senior Executive Service member. This review will include the written rationale for the conclusion to overturn or uphold the command assignment decision.

(a) If the assignment decision is overturned, the conclusion must specify any limitations on the Service member's use of the service dog.

(b) If the assignment decision is upheld, a final appeal may be made directly to the Military Department's Assistant Secretary for Manpower and Reserve Affairs.

(7) The CMT, PCM, or commander will notify the Service member of the final decision and the CMT or PCM will document the decision in their service treatment record.

2. ADMINISTRATIVE REQUIREMENTS. In accordance with their respective Military Department requirements and Component installation management policy:

a. Before a Service member is assigned a service dog, the chain of command must counsel the Service member about installation and facilities access and other related issues.

b. Component installation and MTF commanding officers will ensure Service members with assigned service dogs are granted facility access and accommodation to the greatest extent possible commensurate with health and safety.

c. Service members must register their service dogs with their installations and ensure that proper service dog identification is clearly displayed.

d. Service members are responsible for their service dogs' proper behavior, health, and adherence to appropriate limitations imposed by the chain of command.

e. To the extent permitted by law, Service members and service dog providers may be responsible for any damages and injuries a service dog may cause.

f. Service members who acquired their service dogs before the publication of this instruction or previously-instituted Service policy must provide their PCM or CMT and commanders the suitability assessments and medical necessity documentation for their service dogs within 60 days of the effective date of this instruction.
